Sensitivity Enzyme measurement without prior purification

Stability Reproducibility (CV duplicate sample)

Accuracy Distinguish patient and control activities(Patient cell lines)

Challenge enzyme diagnostics

Distinguish patient enzyme activity from control and lowered enzyme activities

QA for LSD's, a new ERNDIM scheme

What needs to be done

- Other layout of results presentation
- Information about the enzyme assay
- — Inclusion leucocyte sample
-
- Certificate of Participation:
 - score for detecting LSD patients (+)
 - score for reproducibility (+)
 - score for detecting enzyme deficiencies in “normal” samples (—)
